# Carissa grandiflora Natal Plum, Common Carissa<sup>1</sup>

Edward F. Gilman<sup>2</sup>

### Introduction

Carissa is one of Florida's and California's very best seaside shrubs (Fig. 1). This moderately fast-growing, evergreen shrub has lustrous, leathery, rich green, oval leaves and spines along its branches. It is hard to find a plant with darker green leaves. Flowers are somewhat fragrant, white, and star-shaped. The bright red, edible, plum-shaped fruit tastes like cranberries and can be used to make jam. Flowers and fruit are quite showy and are often borne on the plant simultaneously.

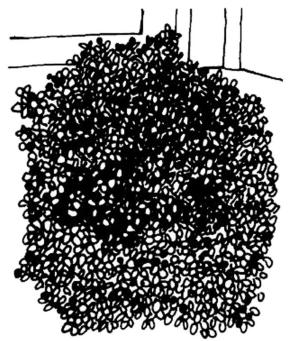

Figure 1. Natal plum.

# **General Information**

Scientific name: *Carissa grandiflora* Pronunciation: kuh-RISS-uh gran-dif-FLOR-uh Common name(s): natal plum, common carissa Family: *Apocynaceae* Plant type: ground cover USDA hardiness zones: 9B through 11 (Fig. 2) Planting month for zone 9: year round Planting month for zone 10 and 11: year round Origin: not native to North America Uses: bonsai; foundation; screen; border; mass planting; container or above-ground planter; fruit; espalier; ground cover; superior hedge; small parking lot islands (< 100 square feet in size); medium-sized parking lot islands (100-200 square feet in size); large parking lot islands (> 200 square feet in size)

**Availability:** generally available in many areas within its hardiness range

Figure 2. Shaded area represents potential planting range.

# Description

Height: 6 to 10 feet Spread: 4 to 10 feet Plant habit: spreading; upright Plant density: dense Growth rate: moderate Texture: fine

#### Foliage

Leaf arrangement: opposite/subopposite Leaf type: simple Leaf margin: terminal spine Leaf shape: ovate Leaf venation: pinnate Leaf type and persistence: evergreen Leaf blade length: 2 to 4 inches Leaf color: green Fall color: no fall color change Fall characteristic: not showy

#### Flower

**Flower color:** white **Flower characteristic:** summer flowering; pleasant fragrance

#### Fruit

Fruit shape: oval
Fruit length: 1 to 3 inches
Fruit cover: fleshy
Fruit color: red
Fruit characteristic: suited for human consumption;
persists on the plant

#### **Trunk and Branches**

Trunk/bark/branches: not particularly showy; typically multi trunked or clumping stems Current year stem/twig color: green Current year stem/twig thickness: medium

## Culture

Light requirement: plant grows in part shade/part sun Soil tolerances: clay; sand; acidic; alkaline; loam Drought tolerance: high Soil salt tolerances: good Plant spacing: 36 to 60 inches

# Other

Roots: usually not a problem Winter interest: no special winter interest Outstanding plant: not particularly outstanding Invasive potential: not known to be invasive Pest resistance: long-term health usually not affected by pests

## **Use and Management**

Natal plum will tolerate a variety of soils and exposures and only needs light pruning. Useful as a screen or hedge, it should not be planted too closely to walkways where its large, forked thorns can injure passersby. It makes a nice, full foundation shrub. While it thrives in full sun, natal plum can adapt to fairly heavy shade and requires only moderate watering and fertilization. Plant on three to six-foot centers for a hedge or mass planting, closer for the compact cultivars. Dwarf cultivars such as 'Green Carpet', 'Horizontalis', and 'Prostrata' make excellent groundcovers.

Propagation is by seed or cuttings.

#### **Pests and Diseases**

Natal plum is relatively pest-free.

Natal plum is susceptible to root rot when plants are overwatered.
