TROPICAL PLANT CATALOG

This catalog is for information only. If you don't see the price - the plant is not for sale.

Microcitrus australasica

Family: Rutaceae

Finger Lime

Origin: Australia

Finger Lime trees are erect trees growing up to 30 ft. The fruits can be green and cylindrical in shape, up to 4" long and only about 1-1.5" in diameter.

Once the fruit is cut open the tiny round juice vesicles will slowly roll out of the fruit without squeezing, and resemble what is called 'citrus caviar'. Used in chutneys, jams, marmalades, savory sauces and refreshing drinks. In great demand for culinary use as it displays well as a garnish.
