A N T H

Unlimited in Varieties

As world leader in breeding and propagation of Anthurium we are known for our innovative growing solutions, and leading range of strong Anthurium varieties.

Every day, we challenge ourselves to develop new varieties with new colours, new shapes and improved characteristics. This new catalogue includes more than 100 Anthurium pot plants and cut flowers available in 2016/2017.

Showroom

An extended diversity in future varieties can be found in the colourful setting of our showroom in Bleiswijk, the Netherlands.

With a range of over 200 Anthurium pot plants and cut flowers displayed, you have the unique opportunity to compose an assortment that is completely tailored to your market and needs.

Take a look at the extensive flowering assortment and assess our selection of prototypes: your varieties of the future.

We are looking forward welcoming you to our showroom anytime.

Healthy growth

Anthurium young plants

Every Anthurium young plant is grown in a 12 ha, state of the art greenhouse. This specially equipped greenhouse meets the most optimized climate conditions. Anthura guarantees an efficient and successful growth of young plants.

Expertise

Cultivation support

The key factor for an optimal start of your cultivation is strong and healthy young plants. By offering step-by-step guidance and tailored cultivation solutions we contribute to a successful growth. Innovation and sustainability play therefore a central role in the way we work and think.

Elite®

Anthura has been a pioneer in guaranteeing strong and healthy plant material. We supply young plants that meet the strict quality requirements of Elite® certification.

Elite® is the top quality trademark of the Dutch Inspection Service for Horticulture (Naktuinbouw) which stands for:

- Distinguishing good and healthy propagated plant material.
- Strict requirements & conditions at process & product level.
 - Proper plant disease prevention system.

Bureau IMAC

Bureau IMAC is an independent consultancy that specializes in technical cultivation advice on Anthurium and Phalaenopsis. The company's activities cover both cut flower and pot plant cultivation at home and abroad.

Anthura works closely with Bureau IMAC.

 Flower size

 Suitable pot size in cm

* Sales of Anthurium pot plant in EU on request

 Flower size in cm

 Production per gross m² per year

 Number of plants per gross m²

Production per gross m² is an indication, depends on the plant density and is based on production results obtained under Dutch circumstances.

 Vase life in days

 Leaf quality

 Suitability Young Leaf Breaking

* In practice these obake varieties can be different from the pictures in the catalogue because of growing conditions.

*** Antique: It is possible to harvest this variety 4 weeks later than normal in order to get a special colour.

General conditions

All our offers, agreements and deliveries will be concluded according to our General terms of sale and delivery of Plantum, filed with Rotterdam Chamber of Commerce, Gouda office, on May 21 2012.
