

Own import

Nieuwkoop Europe imports exclusive and large plants that we select ourselves in their tropical countries of origin. Most plants can be delivered from stock. However, if you have a list of plants with specific requirements, we will go in search of them.

Quality first

Quality always has our priority! The imported plants are first carefully tended and fully acclimatised. This is an important stage before the plants are transported to the assigned project.

Tropical plants

A unique Ficus, an exclusive Dicksonia, a huge Bambusa or an exotic Veitchia? You will find all of these plants in the metres-high greenhouse of Nieuwkoop Europe. Our extensive range of tropical and subtropical plants are well suited for a tropical hall at your zoo.

Advice

Good advice is important at the start of a project. We can advise you about the availability and obtainability of exclusive plants, but we can also help you to resolve complex logistics issues or support you in the planning and preparation of your project.

EAZA

Nieuwkoop Europe is a 'corporate member' of the European Association of Zoos and Aquaria (EAZA).

Green walls

A green wall changes a bare wall into a living green oasis. Green walls can be used to decorate beautiful butterfly gardens, aviaries, alongside footpaths and even restaurants. The possibilities are endless!

Besides the green oasis you create with a green wall, it also has environmental purposes like sound reduction and improved air quality.

Certificates

We believe it is essential to protect our planet and treat it in a responsible and eco-friendly manner. We are therefore proud of the fact that we are MPS-A certified. Where necessary, our exclusive plants are provided with a CITES certificate and/or plant passport.
