Grafic Games

Creating innovative playgrounds with a unique look

Grafic Games is a bold new concept in the outdoor play equipment industry, combining quality manufacturing with graphic design.

It is an opportunity to raise the profile of playgrounds and turn them into a real talking point within the community.

Grafic Games has an innovative decorative finish applied to existing playground equipment.

6 distinctive finishes are available: Grafic, Etnik, Océane, Amazone, Metropolis and Medieval. The colours and images combine to create the Grafic Games series.

Children will love to discover the intricate details that can be used for numerous stories and adventures.

The Grafic Games design can be applied to both plywood and HPL ranges.

The whole design and manufacturing process is carried out internally ensuring both the quality of the finish and the long term durability of the product.

Every detail has been thought of in the production of Grafic Games products. For example a varnish has been applied to provide high levels of resistance to solvents and cleaning products.

Grafic Games play equipment fits into all environments, and can be combined with other themed equipment from the Proludic ranges.

The innovative look of Grafic Games means that they instantly become a focal point of the playground and a source of fascination for users.

Our designers can also create personalised solutions to ensure that your playground is unique and in keeping with a particular theme.

Grafic

pop art, fantasy

The Grafic theme is dominated by bright colours and simple geometrical shapes.

Lines, curves, counter-curves, checks... the patterns interweave and overlap to bring to life a cheerful, naive children's world.

The perspectives give an impression of depth and movement.

The flowers with their irregular contours add a soft, fresh note.

Amazone rainforest landscape

The Amazone theme takes children to a tropical rainforest. The graphics depict a scene of lush, wild vegetation. A world of adventure awaits containing exotic animals, mysterious symbols, vines and ancient temples. Different colours contribute to the creation of a mystical atmosphere. Shades of green are combined with natural earthy colours, contrasting with the bright colours of the parrots and tropical fish.

Medieval medieval fortress

The medieval theme brings to life a period in history that fascinates children and adults alike. The towers contain all the details of a magnificent medieval stronghold, complete with shutters, arrow slits and ivy climbing the walls.

The decorative aspect is further enhanced with banners, coats of arms and flags flying from the turrets.

The use of bold colours such as blue, red, yellow and orange makes the structures stand out.

Metropolis

futuristic city

Metropolis is a futuristic environment that draws its inspirations from the world of science fiction. Engines, propellers, cogs and pulleys combine to create wonderful contraptions that could be straight out of the books of Jules Verne or HG Wells.

The equipment transforms into laboratories, time machines or futuristic vehicles, with a sense of movement being at the heart of the play experience.

The unique copper coloured panels combine with the sun reflections to add to the overall play experience.

Etnik

tribal symbols

With its mix of African and Maori inspirations, the Etnik theme is based on masks, tattoos and prints.

The geometrical patterns alternate between straight lines and curves, to create prints that are simple yet highly decorative. Each panel is unique, but the overall style illustrates a tribal influence.

The predominant colours are those that come from the earth, with shades of brown, ochre and khaki.

Océane

depths of the ocean

This theme is an invitation to take a voyage to the depths of the ocean.

Water is present everywhere, with our evocative, symbolic graphics: the wavy lines in various shades of blue portray the movement of ocean waves; with circles as little bubbles of oxygen. The unstructured patterns with their shimmering colours depict the marine algae that cover the ocean bed and coloured beach huts that line the beach.

Through the combination of these elements a hidden world full of life opens up before your eyes.

The possibility to create a unique project

■ Corporate opportunities

Adapt equipment to fit with a particular theme or a corporate image.

■ Personalised playground linked to local history or culture

Create a link with local history or culture through a unique design.

Project themed around the philosopher Friedrich von Schiller (Germany)

■ Themed play panels

Further increase the play value of equipment with a unique visual finish.

■ Consultation with users

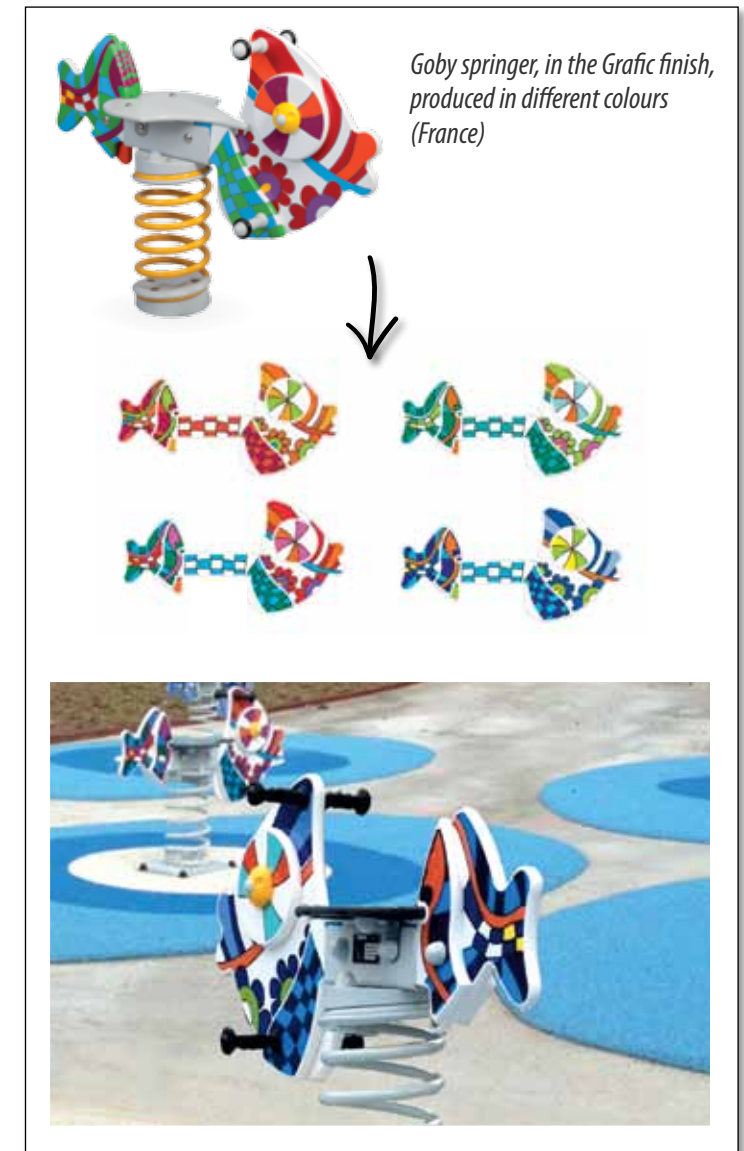

Involve stakeholders (children, parents, clients) at the consultation stage.

Images produced by the local community, and then adapted to produce a Grafic Games finish (France)

■ Multiple choices in the same theme

Develop different looks within the same theme.

Goby springer, in the Grafic finish, produced in different colours (France)
