A great track record!

25 years of experience and innovation have made Proludic a specialist in the European market for outdoor playground and sports equipment.

Our development has always revolved around 4 major aspects:

- A creative approach which we apply to the aesthetics of our products and to overall playground design
- High-performance production methods
- Our initiative and ability to adapt to customer or user requirements
- Our global expertise, which means we are there for our customers throughout the life cycle of our products

The common denominator in all these areas is **quality**. We apply this to all our corporate activities, and it is this which guarantees that our play areas are safe and attractive.

Ultimately, the main driver at Proludic is the philosophy which inspires us, namely the importance of outdoor play and activity for **everyone's well-being**.

This applies to all ages; from toddlers whose play is an essential aspect of their daily lives and a tremendous source of discovery, to adults for whom sport and fitness activities are a way of maintaining a healthy lifestyle.

Our equipment is recognised as being at the same time **fun, original, innovative, practical and ability specific**. It can be adapted to any type of environment, to create focal points of activity in parks, squares, schools, nurseries, city centres, etc.

With the experience we have acquired over the years, we are able to provide optimal design solutions in terms of layout, budget and the choice of products and materials.

Product quality and compliance with safety standards

Design

Our products are designed to address the specific needs of all potential users, whatever their age.

Knowledge, gained from long standing relationships with specialists in the world of child development and sporting activity, contributes to a **rigorous product design process** that includes amongst other factors its shape, play functions, colours and themes.

Compliance

Beyond the functional aspects of the equipment, great care is taken to ensure the **safety of children** and other potential users.

All of our play equipment is inspected and certified by TÜV in accordance with the **EN1176** regulations. Compliance with current Australian Standards **AS4685:2004**, **AS/NZS4422:1996** and **AS/NZS4486:1997** is validated by Civil & Structural Engineering Design Services Pty Ltd. C & S are independent Australian certifying Engineers.

This requirement for safety influences the **technical design** of the equipment, both in terms of creating user friendly products and selecting materials most suitable for intensive use.

Quality is a key feature of Proludic products. All of our play and sports equipment, is designed and manufactured with these demanding safety standards in mind.

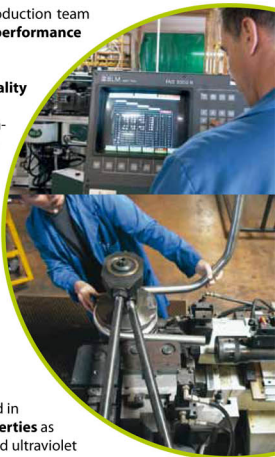

Quality manufacturing

Proludic manages and controls every stage of the supply chain. The production team has been built around **specialist technical knowledge and high performance manufacturing facilities**.

This autonomy and expertise are key factors in ensuring **efficiency and quality** on an international scale.

Our play equipment is installed all over the world and intended for high-level use. It has to cope with all possible conditions of use, variations in site conditions and vastly different climates.

The choices we make in terms of our materials, production processes and finishes are essential in guaranteeing **the robustness of our products** in these different situations.

- ➔ All materials are stringently tested in terms of their **load bearing properties** as well as their resistance to wear and ultraviolet radiation.
- ➔ Numerous testing procedures at each stage of the production cycle **ensure the quality of our products and enable us to exceed our customer's expectations**.

The ability to control our own production is a major asset in serving our customer base, with whom we have developed a reputation for reliability and efficiency.

At Proludic, we aim to constantly improve our performance. In 2001 we were awarded the **ISO 9001** certification, and this has been renewed every year. This award is testament to the effectiveness of our organisation structure.

Our environmental policy bears witness to our commitment to minimising our impact on the environment and is evaluated in accordance with the standard **ISO 14001**.

DIABOLO

Diabolo provides a variety of activities in a compact space. It will bring even the smallest areas to life.

Slides, fireman's poles, climbing walls and hiding places are elements within each structure, arranged around platforms located at 0.60m or 1.17m in height.

These classic multiplay units engage children aged 2 to 10.

Springers

Springers are an essential element of any play area catering for young children. They help to develop balance, physical coordination and provide a great rocking sensation.

With side panels to protect and reassure very young children, or larger-scale structures for multiple users, there is a springer to suit any play area.

Each springer is unique with a specifically themed design to provide further play value.

Swings

Swings are a traditional play item and a key element of any playground.

Available with wooden or metal posts, they will blend into any type of environment.

Proludic swings are available in a 2 seat combination, or a 'pod' measuring more than one metre in diameter, perfect for group play.

Double jointed swing mechanism designed for intensive use

- Stainless steel

TRADITIONAL EQUIPMENT

Balancing and climbing equipment

Balancing and climbing equipment can be arranged in adventure trails on which children can test their balance and agility, while developing concentration and coordination skills.

Designed for children aged 2 to 12, all these items offer different levels of difficulty to suit the age and ability of the users.

They are of great value in areas with a high concentration of children, such as school playgrounds or housing areas.

Rope play

Rope structures enable children to explore new ways of playing, and managing space and heights. Children can move around a 3D space that provides a real challenge for balance and self-control.

The range, with each item composed of a net structure positioned around a central post, contains a selection of post heights in order to cater for the different physical abilities of users aged from 6 to 12 years.

Highly resistant rope

Early years

The items designed for users aged from 0.5 to 5 years old offer a rich and varied range of play functions. Their play features encourage social interaction amongst users as well as promoting the development of motor skills.

The equipment design has been perfectly adapted to meet the needs of younger users through the use of rounded edges, the inclusion of secure low level entry points and the choice of bright primary colours.

Outdoor Fitness

Open air fitness areas have been designed to appeal to as larger an age range as possible from teenagers upwards. The ergonomic nature of the equipment means that it is accessible to all ability levels. The different items replicate the movement and postures found in sports such as running, cross-country skiing, rowing and cycling. Each product is easy to use and targets different muscle groups. Fitness areas provide a fun way to maintain or develop fitness levels in a pleasant environment.

Installation and safer surfacing... we can also help

Proludic also offers a wide range of installation and safer surfacing options.

Throughout the world we are able to offer the following services:

➡ the planning of playground installations and surfacing

➡ carrying out the works

➡ coordinating carefully selected qualified subcontractors

➡ ensuring the successful completion of the project

➡ guaranteeing the conformity of the works to recognised safety standards

By contracting us to install your play equipment and safety surfacing, you can rest assured of a finished result that will comply with current safety standards and provide enjoyment for all users.

A Complete Range

With our extensive range of more than 500 items of play and sports equipment, Proludic design recreation areas for everyone. Suitable for use in a wide range of cultural and climatic environments.

Discover our complete range
in our general catalogue or on our website

www.proludic.com

Customer Service, tailored to your needs

Proludic has a global presence in over 30 countries with a locally positioned Customer Service team in each. This allows Proludic to remain close to its clients and provide solutions that suit each customer's specific requirements.

Our Customer Service approach, adopted throughout the Proludic network, ensures high-quality service based on advice, expertise and support from the very start of a project through to site completion.

● Stage 1: Advice

- Our dedicated Business Development Team will offer support and advice via phone or email.

● Stage 2: Site Analysis

- Site visit and site survey
- Assistance in drawing up specifications (technical and budgetary constraints, objectives, equipment selection, environment, etc.).

● Stage 3: Technical Proposal

- A site specific design, created in accordance with our customer requirements, together with product specifications and an itemised quotation.

● Stage 4: Operational support

- Installation
- On-going support throughout the life of the play area, after-sales services, inspection and maintenance work.

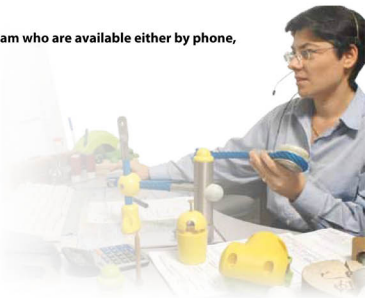

Proludic prides itself on being an organisation that puts customers at the forefront of its operations.

AFTER-SALES SERVICE

Proludic provides effective after-sales support thanks to our team who are available either by phone, e-mail or via our website www.proludic.com.au

The after-sales service section of our website guarantees the quickest possible response time. It provides an opportunity to consult product information such as assembly instructions, certificates of conformity or component standards. Users can also request a quotation for spare parts, which will be provided as quickly as possible.

WARRANTIES

Our guarantees - 2, 5, 10 and 25 years

At Proludic, we are committed to the quality and durability of our products. In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Our guarantees:

2 years for any defect or manufacturing fault of component parts.

5 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Springs
- Moulded or rotary moulded plastic parts (with the exception of moving or mechanical parts)
- Metal crimps and rope assemblies

10 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Metal components (with the exception of springs, moving or mechanical parts and fixings)
- High density plastic parts (with the exception of moving or mechanical parts)
- Non-slip plywood panels
- Posts (timber)

25 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Panels (lacquered plywood/coloured compact/polyethylene)
- Posts (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes

The prices included in this catalogue are exclusive of GST.

GST at the current rate will be added to all orders.

Prices are valid until 31st December 2013.

Delivery is approximately 2-12 weeks from date of order depending on current stock levels.

Delivery charges will be applied to any 'supply only' orders and will vary according to buyers location.

Deliveries that are delayed by the customer after manufacture may be subject to a storage charge.

The colours reproduced in this brochure may not be true to life. Proludic reserves the right to change specifications and make product improvements to any of our products at any time without notice. Information in this brochure was correct at the time of printing.

While every effort has been made to ensure the accuracy of information,

Proludic cannot accept any responsibility for any errors or omissions and this brochure does not form part of any contract.
