HOW TO USE THE PACE PROJECT DIRECTORY

WHAT IS THE PACE DIRECTORY?

The PACE project was started to help organisations in one part of Africa get the benefits from the ideas and experiences of people working in other parts. By sharing ideas we don't have to start from zero. We can learn from other people's experiences and share our own findings with them, so everyone benefits. The PACE directory is a list of people and organizations ready to share useful ideas.

- The PACE Directory was created alongside the following educational materials for use by schools, environmental education centres and community based organisations:
- The PACE FILM on VHS or DVD for schools, environmental education centres and community based organisations
- AFRICA, OUR HOME – a beautiful illustrated book for children, teachers and leaders, including environmental education activities on each topic
- The PACE ACTION SHEETS – more detailed information on the solutions and projects featured in the films
- A wall poster

HOW WAS THE PACE DIRECTORY DEVELOPED?

The PACE project research team focused on finding people who are developing and sharing straightforward solutions to common environmental problems. You will meet these people in the PACE films, and read about them in the book Africa Our Home and the PACE Action Sheets. The PACE directory contains contact details for all these people and the organizations with which they are involved. You can contact them to ask for more information on putting the ideas covered in the PACE pack into practice. Some of the organizations listed may also be able to give further information about grants for specific projects.

HOW DO YOU SEARCH FOR A PARTICULAR ORGANIZATION?

Organizations are listed in alphabetical order within each topic section. Thus, if you read about an organization in an Action Sheet from the Energy section, or saw it in one of the Energy films, you will find the details in the Energy section of the directory.

People and organizations that were featured in the PACE films are marked with this icon: 

If you are consulting this onscreen as a pdf document, you will be able to use the Search button  to search for a particular organization.

Practical Action Southern Africa's
Resource Centre, based in Zimbabwe,
has a collection consisting of over 3000
books, journals, and technical briefs. A
computerised database management
system is used to store, search and
retrieve material for users. The Resource
Centre also holds slides and
photographs of ITDG Practical Action
Southern Africa Projects.

About 40 to 50 users visit the Resource
Centre each week, and whilst many
people utilise the centre for reference
purposes, recommended users can
borrow material without a charge.

Practical Action East Africa's Resource
Centre comprises of publications,
videos, slides, periodicals and ITDG
Practical Action archive material.

The Centre has over 5000 publications
on computerised database, which
facilitates searches and easy access to
information on specific topics. The video
library contains more than 5000 prints
and slides, mainly depicting the activities
undertaken within ITDG Practical Action
programmes. The archive material is a
collection of all documents produced by
ITDG Practical Action East Africa.
Presently, there are more than 500
documents in the archive, including
annual reports, research work, workshop
proceedings, reviews and evaluation
reports.

The Resource Centre is open to
members of the public on a subscription
scheme. Subscribing members can
borrow publications for a period of two
weeks. Opening hours are: 9-12.00 and
from 14.00 to 16.00 during weekdays.

ACT is an international association of players and stakeholders - private, public and NGO sectors, including farmers, input and machinery manufacturers and suppliers, researchers and extensionists committed to the development and promotion of conservation agriculture in Africa. The institutions and persons involved are convinced that conservation agriculture can and does make a difference in the lives of large and especially small scale farmers by increasing and/or stabilising yields while at the same time enhancing resilience in natural resource systems and enriching biodiversity.
