
ACKNOWLEDGEMENTS

I would like to thank:

- my supervisors and mentors Dr. Maurizio Mencuccini and Prof. Keith A. Smith for offering me their valuable guidance, help and support all these years.
- Tom Ball and Johanna Pulli, who made field trips to Harwood fun. I particularly thank Tom Ball for his help with field and laboratory techniques.
- Franz Conen, for all the help in the field and in the lab, for giving me inspiration and courage.
- Lisa Wingate and Robert Clement for their help with the PP-Systems. Lisa Wingate also, for her help in the field and her moral support during my thesis writing.
- Karen Dobbie and Dave Raey for not getting tired to answer to my questions and help me with problems regarding gas chromatographs.
- Allister Kydd who provided valuable help with computer problems.
- Malcom Richie and Derek Scott for providing me with equipment needed at last minute notice and Graham Walker who help dealing with orders.
- Graeme McKenzie, Peter Davis, John McRae, Eric Larsen and George Steedman, of the Darwin workshop, for dealing with all my equipment problems very fast and always at last minute notice.
- Andy Gray for helping with soil C analysis.
- Lena Tani, Sabrina Colombo, for their help and company in the field.
- Special thanks to Natalya Buchkina for her help and support and in the field not only.
- Sven, Alex Phillips, Leoni FitzGerald and Henrike Gabler for their help with soil sampling in the field and soil preparation in the lab.
- Steeve Morris, who provided helpful information about Harwood.
- The Greek State Scholarship Foundation (I.K.Y.) for the partial financial support of my PhD.
