SOME FLOWERS ARE FOREVER...

Since its creation in 1988 in Paris, France, the Verdissimo brand has represented high-end preserved flowers, foliage and trees for unique and sustainable interior decoration and design.

Throughout the years, Verdissimo's know-how and proprietary technology has been continuously improved to obtain an exclusive and reliable product. From the beginning, and thanks to the loyalty of our customers around the world, Verdissimo maintains its position as the leading preserved producer in terms of product range, production capacity and technology.

The goal of Verdissimo is to enable you to enjoy the advantages and atmosphere of a natural beauty with an optimum balance between ease-of-use, ecology and economy.

WHAT ARE PRESERVED FLOWERS AND PLANTS?

The unique preservation technology involves the following 3 basic steps:

- 1** The flower/plant is harvested at the ideal point in terms of natural beauty from one of our 150.000m² of fields.
- 2** The freshly harvested plant enters a proprietary process to absorb a specific mixture of 100% plant-based and bio-degradable preservation formula.
- 3** The preservation liquid replaces the sap and water within the plant, effectively forming a still-image of nature, creating a unique and 100% natural product. The preserved flowers and plants remain beautiful and unchanged for months without watering, light and virtually maintenance-free.
- 4** The basic method of preserving flowers and plants has existed for many years, but was first patented as an industrial process by Verdissimo over 25 years ago. Through the dedicated effort by the Verdissimo team, the technology has optimized and upscaled to today's efficient and large scale operation.

ADVANTAGE OF PRESERVED

Long-lasting and Maintenance-free The preservation process means that the plants require no water or light and maintain their original beauty and fresh look for months or even years.

100% natural All preserved products by Verdissimo are real, natural flowers and plants that have been treated with a plant-based and biodegradable preservation liquid. No toxic ingredients are used.

Ecological The Verdissimo preserved plants are much more efficient than fresh-cut flowers, due to their long shelf life and low energy transport and storage. The result is that the preserved flowers have a carbon footprint significantly lower than for both fresh-cut and artificial flowers. Help protect the environment one rose at the time...

Economical The Verdissimo natural products are excellent value because of their long useful life.

Endless Possibilities The unique attributes and broad variety the Verdissimo preserved flowers make them useful in a vast array of situations. From a bridal bouquet that will keep the memory alive for years to a green wall of plants that bring nature into your office without worrying about additional maintenance or cost.

CORRECT CARE AND USE

The Verdissimo preserved plants are extremely resistant and long-lasting. With the right care, you can enjoy your natural product for months or even years. The Verdissimo natural products do not require pruning or watering.

The only care the product requires is occasional removal of dust, ideally with an air spray, air blower/dryer or alternatively dusting with a soft cloth.

To keep your Verdissimo flower or plant in optimum conditions, please follow this advice:

- Avoid crushing, pressing or folding the foliage, petals or flowers.
- Avoid prolonged exposure to direct sunlight
- Avoid exposure to humidity above 80%
- Only for indoor use
- No watering or placing the product in water

+6 month use

100% natural

No light or water required

Need water?
Get the perfect look.

The Aqua Flo system offers a simple and esthetic solution for two important needs:

- Simulate the effect of water
- Secure your creation in any base or support.

It comes as two separate components mixed together to create both a powerful adhesive and a beautiful image of water to complete any arrangement.

The **Guirnaldas-Verdissimo** group is the world's largest producer of preserved flowers and plants. Preserved flowers are a 100% natural and a virtually maintenance-free decorative solution.

The preservation process allows us to create a unique product that combines the best of two worlds: The unique beauty of a natural plant combined with the durability of an inert object.

The Guirnaldas-Verdissimo group has sales in over 40 countries and +500 employees. The group has sites in Colombia, Spain and Ecuador including and state-of-the-art production facilities and 180.000m2 of fields and greenhouse installations for optimum growing conditions and product quality.

For further sales and product information please visit our web page www.verdissimo.com or contact one of our offices or partners around the world:
